Course PROPROFISSÃO - Web Development with Python

SENAC Lapa Tito São Paulo, Brazil *January 2024 – May 2025*
Technical Degree in Web Development

Escola Estadual Pereira Barreto São Paulo, Brazil *February 2020 – December 2022*
High School

PROJECTS

DunDum *February 2026 – July 2026*

Web platform for monitoring dog health.

- Served as **Scrum Master** and **Full Stack Developer**, contributing to **team management**, backlog definition and prioritization, and activity tracking.
- Developed the front-end using **React.js** and the back-end using **Node.js**, creating REST APIs, authentication, and external integrations, while modeling the database with **PostgreSQL** and Prisma ORM.
- Developed a **Python** module to analyze simulated collection data and generate customized alerts.
- Presented the project at the Instituto PROA DemoDay to an audience of approximately **300 people**.

BookPrice *May 2026 – June 2026*

Automation for searching book prices.

- Developed a **UiPath automation** to search for the prices of 75 books across e-commerce platforms.
- Integrated **REST APIs** and **Web Scraping** for data collection and processing.
- **Automated CSV report generation** and the comparison of the best offers.
- Reduced the time required to conduct the search from approximately **6 hours to 30 minutes**.

SKILLS

- **Technologies:** Python, JavaScript, TypeScript, React.js, Node.js, PHP, SQL, MongoDB, APIs, Git, GitHub, AWS.
- **AI & Automation:** Robotic Process Automation (RPA), process automation, data analysis, UiPath.
- **Tools:** Microsoft Office (Excel, Word, PowerPoint), Jira, Trello, Slack, Scrum, Kanban, Figma, Canva.
- **Soft:** Communication, organization, proactivity, problem solving, ease of learning.

LANGUAGES

- **Portuguese:** Native.
- **English:** Intermediate (B2).
- **Spanish:** Elementary (A2).
